Vac Truck Operator

Description

A Vac Truck Operator is responsible for driving and operating heavy-duty vacuum trucks to safely extract, transport, and dispose of liquid and solid waste from various sites. This role requires meticulous attention to safety protocols while performing high-pressure cleaning and industrial suctioning for utility, construction, or environmental projects.

Responsibilities

- driving truck
- operating vacuum
- transport and dispose of waste

Qualifications

- **Commercial Driver's License (CDL):** Possession of a Class A or B license, often with a Tanker (N) endorsement and a clean driving record.
- **Equipment Proficiency:** Demonstrated experience operating high-pressure vacuum systems, hydro-excavation tools, and heavy-duty pumping equipment.
- **Safety & Compliance:** Thorough knowledge of DOT regulations, OSHA safety standards, and proper hazardous material handling procedures.
- **Physical Stamina:** The ability to lift heavy hoses (up to 50 lbs), work in varying weather conditions, and manage physically demanding tasks in industrial environments.
- **Technical Problem-Solving:** Strong mechanical aptitude to perform routine equipment maintenance and troubleshoot system issues on-site.
